

CAD

International Conference on Computer Aided Design in Mechanical Engineering

CALL FOR ABSTRACT - CAD

About Conference: ScienceFather takes the privilege to invite speakers, participants, students, delegates and exhibitors from across the globe to its International Conference. The CAD International Conference is an annual gathering. This conference is a unique international platform that's a meeting of all stakeholders of the Industry, Academia, Researchers, Innovators, Scientist, Regulators coming together to present and discuss technological advances in CAD and Mechanical Engineering. We look forward to personally welcoming you.

Objectives: The International Conference is attracting high quality papers in different subfields. Offer the opportunity to be updated on the latest research outputs on several topics. Organize specific workshops around the most attractive and current issues. Gather worldwide experts as conference speakers. More focused sessions that will feature cutting edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

Key Features: Journal Publication in ESCI, Scopus, Wos Indexed | Excellent Venue | Inspiring Speakers | Conference Proceedings with ISBN | Best Presentation Awards | Best Poster Awards | Best Paper Awards

Topics of interest include, but are not limited to: Automated inspection | Computer aided machine design | Computer technology for design and simulation | Decision support systems | Demolition/remediation Design of mechanical and electromechanical devices | Engineering | graphics and sketching | Facilities management | Fluid mechanics | Heat transfer | Industrial engineering | Intelligent control systems | Leather technology | Logistics | Machine design | Machine elements and two-dimensional mechanisms | Management information | systems | Manufacturing processes | Materials selection and structural design | Mechanical maintenance | Operational research | Quality control | Robotics | Solid mechanics | Textile engineering
